

Hasanuddin University, Indonesia

MALARIA PROGRAM

- Secured multi-party collaborations from Eijkman Molecular Institute in Jakarta, Padjajaran University, Saga University in Japan (specialized in malaria mosquito research), the World Health Organization and the United Nations Children's Fund (Unicef).
- Blended learning approach: interactive videoconferencing with the self-paced study on CD-ROM and moderated e-discussion and community building, as well as lectures by world acclaimed experts.
- One week duration allocating one day per topic starting from February 2012.
- Budget submitted to Hasanuddin University. Expectation that faculty of medical sciences will fund the program.
